

Harness FBH10 Datasheet

FBH10

Base model for the composite range of harnesses. Harness design has no metal fittings, all connection points being composite. Worn as the normal FBH range providing additional security in areas not covered previously, such as glass lined tanks, work on special surfaces and in close proximity to high electrical charges. Other uses may extend to theatre or television due to quiet nature of harness and can be produced in single black.

Principal features:

- Easy to put on and take off
- Ultra lightweight
- Polyester webbing
- Shock absorbing rear dorsal connection
- Comfortable to wear
- Quiet
