

RL2 Retractable Shock Absorbing Lanyard Datasheet

RL1 and RL2

Both items have been tested and approved to EN360, however Checkmate policy is that the RL1 is used for restraint only and the RL2 should always be used if a fall is possible. The RL2 incorporates a tear web shock absorber that cushions any fall and also protects the device from damage due to shock.

Principal features:

- RL2 has tear lanyard incorporated
- Both units protected by robust PVC casing
- 50mm webbing
- 2.2 and 2.5m lanyards RL1 and 2 respectively

EN360
